Pond and Lake Connection's yearend report provided a summary of the weed treatment. No milfoil was found in the treatment areas and fanwort was mostly absent from treatment areas. Suggested was to complete a whole lake aquatic plant survey in order to discuss future herbicide treatments and locations.

A meeting was held with First Selectman, Tim Griswold. Permission for RLA to complete and monitor herbicide applications by deadlines was granted, the board will need to stay within the budget for all expenses. RLA will gather quotes for lake management.

The Rogers Lake dam sluiceway is now controlled by David Evers. RLA is collecting information on the dam in order to create an operation manual and emergency operation manual for the sluiceway. DEEP does requires the town to have an operations maintenance manual available for operation.

A request for quote was created for SWCA environmental consultants to move forward with lake treatment and environmental management. RLA would like to meet all water quality testing requirements for lake treatment permits. SWCA will send a quote by January 13th. All quotes will be presented to the town.
